

PRESS RELEASE

Depro Profiles selects OMP Plus to schedule its plant in Komen

Wommelgem, February 23, 2010

OM Partners, experts in supply chain planning, have announced that Depro Profiles has chosen to implement its OMP Plus solution for its plant in Komen (Belgium).

Depro Profiles produces a wide range of wrapped products for interior design for national and international customers and for important flooring companies. It is specialized in wall and ceiling panels, flooring accessories and frame & furniture profiles.

Depro Profiles will use OMP Plus to schedule the flow through its plant. The planning software should lead to a higher visibility of the supply chain and an optimized use of the existing machines. A better view on delivery dates and availability of human resources will allow the company to plan its workforce more in advance. The result will be a smoother working environment and more flexibility to handle rush orders. OMP Plus will be tightly integrated with the plant's SAP-ERP system.

Jacques Desmet, Owner: "After a thorough selection procedure, we've selected OM Partners for its powerful planning solution and for its seamless integration with the SAP system. They have worked closely with us to find the best fit for our needs. Their solution, together with their experience in the flooring industry, was a decisive argument to choose for OM Partners."

About Depro Profiles

Depro Profiles is a family business established by Jacques Desmet in 1992. It produces a wide range of wrapped products which are distributed to a variety of both national and international customers. The company is specialized in wall and ceiling panels, flooring accessories, frame and furniture profiles.
