

# Great players **wanted** for great teamwork

## **MATHEMATICAL DEVELOPER**

OM Partners develops and implements software solutions for supply chain planning, ever since 1985. We work from our head office in Antwerp (Wommelgem) and subsidiaries in Germany, France, the Netherlands, the USA, the UK and China.

Our customers include many of the largest companies in the world.

You'll discover the exciting world in which today's market leaders operate and help them to optimize their supply chain.

To support the strong growth of OM Partners in the forecasting domain, the forecasting development team within OM Partners is looking for a Mathematical developer.

Forecasting is a key element for integrated supply chain planning. Demand can be generated through a collaborative process, best fit statistical forecasting strategies, aggregation and breakdown rules and accuracy measurements. The forecasting module is designed to increase forecast reliability, manages changing demand complexity and provides fast and intelligent solutions.

### **RESPONSIBILITIES**

As a Mathematical developer you are responsible for the technical analysis and development of cutting edge statistical algorithms and expert systems to predict

future demand. You also act as an expert for the users of the statistical forecasting module. Next to this, you will work together with your team members on improvements of the forecasting functionality in OMP+, by performing analyses and developments.

#### PROFILE

You have a Master degree in a Mathematical, Scientific or Engineering field. Having a PhD in one of these fields is a definite advantage.

You have a solid IT background. Working knowledge of Object Oriented Programming, preferably C++, is an asset. You benefit from having experience with

stochastic forecasting techniques and algorithms.

As you will work on complex mathematical software, you need to be very analytical, creative and have strong mathematical and statistical ability.

You are fluent in English.

You are fun to work with and a great team player.

#### OFFER

OM Partners gives you the opportunity to solve challenging problems in the domain of supply chain planning, our main field of action.

We stimulate mutual confidence, respect and support. We believe in a no-nonsense approach and solid relationships with a long-term perspective, both with our customers and with our employees.

As a growing company, we offer excellent career opportunities in our head office and abroad.

Working with OM Partners you'll experience constant encouragement for personal growth. On top of that, we offer an attractive salary package with extralegal advantages.

If you are interested in the exciting world of supply chain planning, [send your CV](#).
